QA Engineer | Technical Operations | AI-Assisted Product Builder

QA and technical operations professional with experience in manual testing, release support, AWS-based deployment workflows, GitHub repository coordination, IAM access support, and public web-product delivery. Supported deployment and maintenance activities for 254+ Virtual Labs websites and repository operations across approximately 3,000 GitHub repositories. Strong background in functional testing, regression testing, smoke testing, defect reporting, sprint coordination, and production support activities.

TARGET ROLES

QA Engineer / Manual QA Engineer	Technical QA Engineer
QA Analyst	GenAI QA Analyst
AI Product QA Engineer	AI Application Tester

CORE SKILLS

Quality Assurance: Manual testing, functional testing, regression testing, smoke testing, sanity testing, mobile app testing, test execution, defect reporting, retesting, UAT support, bug lifecycle management

Tools And Platforms: Jira, GitHub, GitHub Issues, Git, GitHub Actions exposure, Google Workspace Admin, Vercel

Cloud And Deployment: AWS S3, CloudFront, Route 53, EC2 exposure, IAM access coordination, deployment support, DNS and SSL/TLS renewal support

Web And Product Skills: HTML, CSS, JavaScript fundamentals, React exposure, responsive website delivery, product workflow thinking, AI-assisted development using ChatGPT, Gemini, Cursor, and Codex

Currently Building: Playwright, API testing with Postman, SQL basics, TypeScript basics, AI API integration, technical documentation for portfolio projects

PROFESSIONAL EXPERIENCE

Tester / Technical Operations Associate

IIIT Hyderabad - Virtual Labs / VLEAD | Hyderabad, India | Feb 2023 - Present

- Perform QA and technical operations activities for Virtual Labs, supporting testing, deployment, repository coordination, and operational release workflows across 254+ deployed lab websites.
- Support AWS-based lab hosting and deployment activities involving S3, CloudFront, Route 53, EC2-based legacy environments, and related infrastructure coordination.
- Coordinate GitHub repository setup, issue-based updates, access support, and release-related communication across approximately 3,000 repositories, including experiment-level repositories for individual labs.
- Maintain and resolve issues across lab and experiment repositories, working with developer teams to validate fixes and keep hosted lab content available.
- Assist with IAM user, role, and permission-related activities following least-privilege access practices.
- Support DNS, CloudFront distribution, SSL/TLS certificate, and hosting-related maintenance tasks for lab environments.

Web Product Builder And QA Practitioner

Selected Product And Web Delivery Projects | Remote | 2023 - Present

- Built and deployed multiple public web projects using modern web tools and AI-assisted development workflows.
- Delivered responsive websites and product concepts with attention to user flows, content structure, deployment, and basic quality checks.
- Created product-oriented applications that support the transition from manual QA into QA automation, technical QA, and AI-enabled product testing.

Functional Tester

Spectrum Life Science | Hyderabad, India | Apr 2022 - Mar 2023

- Executed functional testing, regression testing, and defect retesting for web application workflows.
- Collaborated with development teams to reproduce issues, verify fixes, and support defect closure.
- Participated in sprint discussions and delivered feature demonstrations to product stakeholders.

Functional Tester - PointX Mobile Application

Sureminds / Publicis Sapient Client | Remote | Nov 2021 - Apr 2022

- Tested mobile application features with focus on functional behavior, GUI validation, and regression coverage.
- Participated in sprint ceremonies and coordinated with QA and development teams on issue resolution.
- Supported defect reporting, retesting, and release-readiness activities.

PROJECT PORTFOLIO

Automated Website Generator

AI-assisted web-product concept; demonstrates product thinking and configurable workflow design.

<https://automated-website-generator.vercel.app>

Consultant Space

Service marketplace concept with multi-role workflow and business-process modeling.

<https://consultantspace.com>

TeadusTech

Public commercial-style website demonstrating responsive website delivery.

<https://teadustech.com>

Vaidika Darma

Public static website demonstrating content presentation and live deployment.

<https://vaidikadarma.com>

EDUCATION

MBA - Finance And Marketing, Osmania University | 2012

B.Com, Osmania University | 2010

Positioning: QA and operations background with practical exposure to deployments, GitHub workflows, AWS hosting support, public web-product delivery, and growing API testing, Playwright, cloud deployment, and AI-enabled product testing skills.
